SKILLS React, Redux, Python, Flask, JavaScript, Express, CSS, SQL, Sequelize, PostgreSQL, SQLite3, SQLAlchemy, Docker

PROJECTS

DRINK CAWFFEE (Python, Flask, JavaScript, ReactJS, HTML, CSS, Docker)

[live](#) | [github](#)

A coffee curation and ecommerce site inspired by Drink Trade, where users can curate and purchase coffee

- Leveraged relational database management system to allow users to mimic ecommerce transactions
- Implemented **Redux** architecture's unidirectional data flow with **React** props for predictable state and **DOM** rendering
- Connected the Flask backend to **AWS S3** for media storage while maintaining content security with **AWS IAM**

SQUEAL (Python, Flask, JavaScript, ReactJS, HTML, CSS, Docker)

[live](#) | [github](#)

A collaborative Yelp clone where users can review and list local restaurants

- Integrated **Google Maps API** with **React** components to implement dynamic location visualization for businesses
- Implemented multiple many-to-many backend relationships and optimized database usage by observing **SQL** and **Active Record** best practices
- Utilized the unidirectional state management of **Redux** to simplify **React** components and directly manage data for form inputs and form submissions

HEIR BNB (Express, Sequelize, JavaScript, ReactJS, HTML, CSS)

[live](#) | [github](#)

An Airbnb clone where users can explore, book, and review homestays

- Created custom **SQL** queries and implemented aggregate functions to extract data across multiple tables in a single query
- Ensured user privacy and autonomy through both frontend and backend authentication measures and **React Router**, ensuring users may access and edit only their reservations and listings
- Developed custom modal framework using **React** component architecture to create an intuitive user interface

EXPERIENCE

Operations Coordinator Lead & Trainer

Trusted Health

Mar 2021 - May 2022

- Exceeded performance expectations consistently and project managed the onboarding and compliance of over 270 travel nurses at a 99% success rate during peak COVID seasons
- Led a team of 5 operations coordinators in communication with 4 managed service provider partners, including the company's 2nd largest partner in volume, to ensure hospital-patient safety through compliance
- Personally trained 5 operation coordinators from Day 0 to being fully on-ramped in 3 months, one of whom became a Lead
- Designed a new hire training curriculum, incorporating cross-department feedback to expedite training processes

Medical Assistant & Patient Care Coordinator

California Sports and Orthopaedic Institute

Apr 2019 - Feb 2021

- Coordinated clinical care for up to 30 patients daily by organizing medical workup and telemedicine software support
- Communicated with out-of-clinic physicians, local hospitals, and physical therapists to organize full medical history and coordinate follow-up care for up to 30 patients daily

Regulatory Affairs and Compliance Intern

Entrotech life sciences, inc.

Sept 2015 - Aug 2018

- Spearheaded a new product launch by leading a team in product testing, establishing foundational workup for a medical device
- Conducted FDA failure mode and effects experiments and analysis to develop medical device risk management plans

EDUCATION

Full Stack Software Engineering - [App Academy](#) (1000+hr software development program) | Fall 2022

BA Molecular and Cell Biology, Immunology, Infectious Diseases - *University of California, Berkeley* | Fall 2015 - Spring 2019
